Programming with Sounds, Part 5

Exercise 9

Is there any credence to the rumors that if you play some songs backwards, you’ll hear hidden messages? To help explore this, you’ll need a function that takes a sound and produces the reverse of that song. Write one!

What does gettysburg10.wav sound like backwards? Does c4.wav sound any different backwards?

Exercise 10

Many sounds fade out at the end. Write a function that will take a sound and a number of seconds (s) and generate a copy of the sound that gradually fades during the last s seconds.

Try fading out the last 5 seconds of gettysburg10.wav.
