Getting Started with Scribbler

To connect your computer to a scribbler:
1. launch IDLE (it's in Applications/myPython)

2. type: from myro import *

3. depending on which robot you have, type:
   init("/dev/tty.addison")
   OR init("/dev/tty.blackstone")
   OR init("/dev/tty.cornell")

Launch the gamepad and drive the robot around a little:
   gamepad()
