Homework Requirements

1. **Every homework should include a heading:**
   Your Name  
   Chapter Number, Assignment Number  
   Page Number, Problem Numbers

2. **Copy the question.** In the case of long word problems, summarize the problem but have the essence of the problem copied down.

3. **Attempt every problem.**
   If a geometry problem: A diagram/picture must be drawn for most geometry problems. If in doubt, draw the picture. We will not grade your work without the picture. (What's the message? DRAW THE PICTURE!)
   If it is a word problem: Identify variable. Include a sentence “Let x = “  
   Re-read question. Write equation.  
   Solve equation.  
   Write answer in context of original problem.
   If it is a proof, copy the picture, the GIVEN, and what is to be PROVEN.

4. **Compare your answer with the answer at the back of the book.**
   If it is correct, mark it with **C**.  
   If it is incorrect, try to find your mistake. Go back over your work. Check that you have copied the problem correctly. Watch for sign errors. Check for numerical inaccuracies.  
   Mark every wrong problem with an **X**.

5. **Be ready to ask homework questions at the start of each class.**
   When we go over the problems in class, make the corrections on your paper.

6. **Turn in your homework each day.** It is your responsibility to turn it in even if I don’t ask for it.
